

Donation of Patient Electric Cart to National Institute of Heart Diseases

National Institute of Heart Diseases (NIHD), situated in Rawalpindi is a quality coronary health facility, which is providing lifesaving treatment to hundreds of patients on daily basis. Heart patients undergoing treatment at the facility in routine require transportation between different health facilities situated within the premises of the facility.

For this, CSR Department has extended donation for an electric cart vehicle for the transportation of patients within NIHD. Being electric, the cart is also environmental friendly as up gradation and safeguard of environment is one of the primary segment of FFC CSR program.
