

A new milestone for FACE

Food Security and Agriculture Center of Excellence (FACE) sets a new milestone as its Donor Outreach campaign paved its way with a triumph.

In efforts to bring forth sustainable solutions for the rural farmer community of Rahim Yar Khan, FACE has successfully secured a German grant. The project initiated under the banner of this grant will nurture the needs of small farmers of the region by providing post-harvest storage solutions.

60 Zero Energy Cooling Chambers are in the pipeline, these compartments offer an economical solution for storage of harvest including grains, fruits and vegetables that were previously being mismanaged. FACE also aims to train farmers on the importance of managing post-harvest losses, its importance in national food security, best farm practices and connecting with market for higher returns.
